

PRODUCT INFORMATION SHEET

Product Group: Fern	Asplenium Australasicum (Birdnest Fern)
Description:	An Australian native found in tropical and temperate rainforest. It is a large nest-forming species with long broad simple fronds and grows as an epiphyte on rainforest trees or among rocks in drier forest.
Planting Position:	Very popular fern for pots, shade house or garden. Plant in filtered sunlight. Keep moist, but not wet. Temperature Range 1° to 42°
Plant Size (approx):	1.2m high x 1.2m wide
Planting:	Dig a hole approximately twice the size of the container. Remove plant and place into the hole so the soil level is the same as the surrounding ground. Fill in the hole and push down firmly and water in thoroughly.
Fertilizing & Watering:	Fertilize in spring with a slow release fertilizer and water to keep moist in a pot situation.
