

PRODUCT INFORMATION SHEET

| | |
|------------------------------------|--|
| Product Group: Fern | Blechnum Penna-Marina (Alpine Water Fern) |
| Description: | A very hardy ground cover fern that will tolerate most conditions. This fern has small fronds of about 15cm long which are a copper-red when new. |
| Planting Position: | Best Grown in a moist, shaded position in humus rich free draining soil. Ideal for areas that suffer from extreme cold. Will grow equally well when planted in a shaded fernery or part shade garden position Temperature Range 0° to 40° |
| Plant Size (approx): | 15cm - 30cm high x spreading |
| Planting: | Dig a hole approximately twice the size of the container. Remove plant and place into the hole so the soil level is the same as the surrounding ground. Fill in the hole and push down firmly and water in thoroughly. |
| Fertilizing & Watering: | Fertilize in spring with a slow release fertilizer and water to keep moist in a pot situation. |
