

PRODUCT INFORMATION SHEET

Product Group: Cordyline	Cordyline Jive (Cordyline australis)
Description:	New variety with colourful weeping variegated foliage. The new foliage comes through with a bright variegation of cream on bright emerald green. As the foliage matures the variegation changes to a brilliant yellow on deep forest green. Ever changing colour of the foliage year round is unique to Jive.
Planting Position:	Plant in full sun or part shaded area in well drained soil. Excellent for mass display in garden or as a feature in a tub. Temperature Range 1 ° to 40 °
Plant Size (approx):	2m high x 1.5m wide.
Planting:	Dig a hole approximately twice the size of the container. Remove plant and place into the hole so the soil level is the same as the surrounding ground. Fill in the hole and push down firmly and water in thoroughly.
Fertilizing & Watering:	Fertilize in spring with a slow release fertilizer and water to keep moist in a pot situation.
